

COMMITTED TO NUCLEAR MEDICINE EDUCATION

NucMedEd.org

Valuable Online Courses Are Just A Click Away For Our Customers.

Curium invites you to visit our Nuclear Medicine Education website. Through this website we strive to provide a robust variety of Continuing Education (CE) programs that focus on the needs of Nuclear Medicine Technologists.

The courses are structured in a self-paced learning format, conveniently accessible 24 hours a day, 7 days a week, and include course assessments and certificates that are printable upon completion.

All courses are approved for Category A credit, recognized by American Registry of Radiologic Technologists (ARRT) and Nuclear Medicine Technology Certification Board (NMTCB), and are offered free of charge to our customers.

Your local Curium Representative can help you access your free courses. If you have questions about how to register, or want to find out who your representative is, call 888.744.1414.

Curium provides funding to make educational courses available to our customers. We do not create, control, or influence the content of the educational courses offered on NucMedEd.org.
